Casual / Temp Assignments

Company: CSG International■■■

Position: Software Developer Internship

Date: August 2015 - December 2015

Duties:

In a team of three, I collaborated in planning, designing, developing, testing and deploying web application software that tracks build statuses of company software projects under test environment. This application displayed statistical progress of each software project on screen, visible enough for developers to see. Bootstrap, CSS, HTML, Java, JSON, J-Query, JSP and REST are software development tools used.

Enforcing clean code by using OOP, TDD, design principles and patterns.

Learning software industry best practices, including scaled agile framework (SAFe), release planning and teams self-management.
